

**BLUE MARBLE
GEOGRAPHICS**

Dear _____ (*recipient's name*),

I am requesting approval to obtain an academic license of Global Mapper Pro®, an all-in-one GIS software developed by Blue Marble Geographics®. This software is globally known for its user-friendly interface, professional-grade geospatial tools, robust file format library, and more!

International academic institutions are verified by Blue Marble Geographics resellers and receive a 25% discount on licensing. Blue Marble Geographics does not offer student licensing at this time, therefore, access would need to be obtained at the institutional level from a professor or department advisor. Academic licensing is intended for teaching purposes; research projects require a paid perpetual license of the software.

The application for academic licensing is located [here](#) for a professor/advisor to complete. Thank you for considering my attendance at this accessible and educational event.

Regards,
